Professional Experience

Injaz Tech

Software Engineer - Frontend Developer

Mazzeh, Damascus

October 2023 - Present

- Developed and maintained **scalable frontend architectures** for large-scale, high-traffic applications.
- Built reusable, well-structured **Angular components and services** following best practices.
- Implemented **Reactive Forms** with complex validation logic and backend error integration.
- Translated **Figma designs** into pixel-accurate, responsive user interfaces.
- Ensured cross-browser compatibility and consistent UX across web and mobile devices.

[Injaz Tech](#)

Freelancer

Lead Frontend Developer

Remote

2024 - present

Built **high-performance, production-grade web applications** with a focus on **e-commerce, education platforms, and content-driven systems**.

Selected Projects: ProjTech (Next.js company portfolio) · Sevilla (online bookstore e-commerce) · Córdoba (e-school registration with dynamic multi-step forms) · Zaytoon (olive store e-commerce) · Triple Platform (media pre-production system) · Spandovia Pflge (medical website)

Tech Stack:

React, Next.js, TypeScript, Tailwind CSS, shadcn/ui, Stripe API, Redux Toolkit / Jotai, Formik, Yup, Axios, Day.js, Framer Motion, i18next

Voila

Frontend Developer

Alrawda, Damascus

June 2023 - Sep 2023

Designed, built, and maintained **responsive, user-focused websites**, with a strong emphasis on **UI design, clean HTML/CSS structure, and interactive JavaScript behavior**.

Key Technologies:

HTML, CSS, JavaScript, Bootstrap, Git, React, Next.js

Skills

Front End Development

Mid-Level Senior

html, css, Javascript, Typescript, Bootstrap, Tailwind, React, Nextjs, Angular, Angular-material, version control, RESTfull API, react-query, redux, axios, react-router, RxJs, MUI, @Biomejs, RSC, Material-tailwind, vite, SCSS, shadcn/ui, Performance Optimization, SEO Optimization, Core Web Vitals, Responsive Design, CSS Preprocessors, Problem-Solving, Web Accessibility, PWA, gitlab, agile, bundling, webpack, primeNg, primeReact

UI/UX Design

Mid-level Junior

User-Centered Design, Sketch, Figma, Personas & Scenarios, Design Systems, Design Thinking, Accessibility, Responsive Design, Visual Design, Wireframing & Prototyping, User Research, Interaction Design

Backend Basics

Solid understanding of SQL databases and core backend concepts including MVC architecture, controllers, models, database migrations, and API-driven application design.

Key Projects

E-Visa Platform

December 2023 - Present

Government visa application platform delivering **end-to-end online submission, tracking, and processing** of visa requests.

- Contributed to a **UI/UX redesign** to improve clarity, accessibility, and user flow across the application.
- Updated and aligned the **visual identity** to comply with new official Syrian Identity **branding guidelines**.
- Implemented **dynamic, metadata-driven forms** with complex validation logic.

Built with: Angular, Angular Material, RxJS, Tailwind CSS

Hader Platform

October 2025 - Present

- Delivered a full **UI/UX redesign** for a government web & mobile portal.
- Built dynamic, metadata-driven forms with advanced validation handling.
- Integrated PrimeNG components and improved performance & UX consistency.
- Solved complex date, validation, and form-state issues in large-scale Angular apps.

Complaint Management System

April 2024 - September 2024

Role-based complaint management system with **multi-level escalation workflows**, enabling secure handling, tracking, and resolution of complaints across different authority levels.

Built with: Angular, Angular Material, RxJS, Tailwind CSS

Key Features: Dynamic UI, role-based access control, secure permission handling

Certifications

UI / UX Bootcamp

2022-08-01

UNRWA

I have completed a training course and received an excellent grade from UNRWA.
